

Standard 1200

Setting the standard is what we do best

The Standard 1200 Air Lift is ready to simplify your service department. The Standard 1200 Air Lift has been revolutionized with a maintenance-free air bellows, so your focus remains in the shop. We boosted the capacity on our best-selling lift by 200 lbs., so this lift is ready to tackle motorcycles, ATVs, and snowmobiles.

What about safety? The Standard 1200 features an automatic ratcheting safety mechanism with dual springs that create a positive lock as the lift is raised. The safety mechanism is easily flipped back to lower the lift, and automatically resets once the lift reaches the bottom. With the automatic reset, there is no more worrying about the operator having to remember to set the safety bar.

That's not all! We raised the maximum height by nine inches so the Standard 1200 is perfect for even the tallest mechanics. Built with heavy-duty domestic steel and finished with a durable powder coat finish, the Standard 1200 features a texture-black frame with gloss black accessories. When you are looking for a lift that can do it all, look no further than the Standard 1200 Air Lift. Always American made, only from Handy.
